

Sii Poland

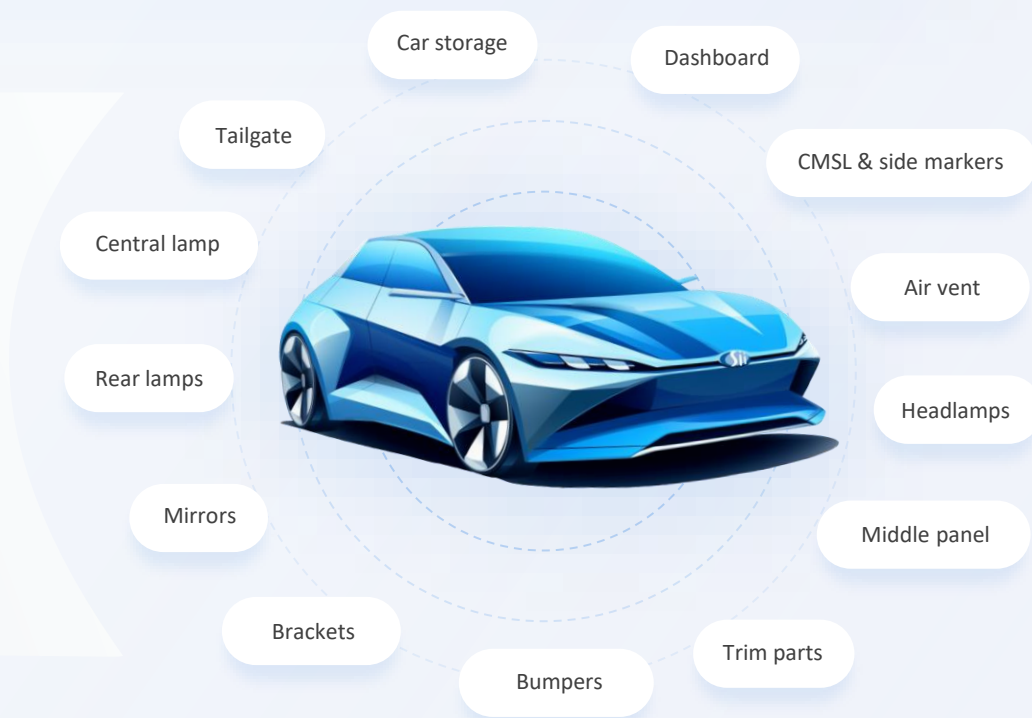

Product Design Studio

Your partner in automotive innovation

- > High availability of experts inside Sii and an effective recruitment process for new candidates
- > R&D support by working directly with customer teams
- > A pool of specialized profiles from mechanics, electricians to electronics and simulation engineers
- > Compliance with norm & standards TISAX, Common Criteria, ISO 9001, ISO 27001, ISO 14001

Key products

- > Interior
- > Exterior
- > Lighting

Product Concept Design

- Product concepts
- Aligned with style, legality, and market
- Technical feasibility of design

Product Detailed Design

- Precise design of mechanical, optical, and electronic systems
- FEM simulations for robustness
- Focus on functionality, performance, aesthetics

Product Optimization

- Optimization of product parameters
- Refinement of details to achieve best performance
- Support in testing for durability and reliability
