

# NIS 2 OFFERING

CYBERSECURITY COMPETENCY CENTER

## NIS 2 overview

## NIS 2

### Key Information

- > NIS 2 is an upgraded version of NIS 1 directive introduced in July 2016 on security network and information systems
- > It introduces **more stringent requirements** for risk analysis, incident handling, audits, and cyber education to boost the cybersecurity of organizations
- > Compliance with the directive is essential for companies identified as part of 18 Highly Critical and Critical Sectors, such as **Energy, Transportation, Finance, Health, Public Administration** to name a few, covering 180k+ companies around the globe
- > NIS 2 will replace the existing NIS 1 directive from **October 2024**

# What is necessary to upgrade to NIS 2?

## KEY FACTS

Cyber attacks are becoming more common and more sophisticated

Complex cloud environments need to be addressed security-wise

Increasingly complex regulatory landscape requiring standardization across sectors

# NIS 2 vs NIS 1 in comparison

Main principles

Is it for me?

More stringent requirements and more sectors impacted

The need to secure business and chain supply continuity

Improving and streamlining reporting obligations

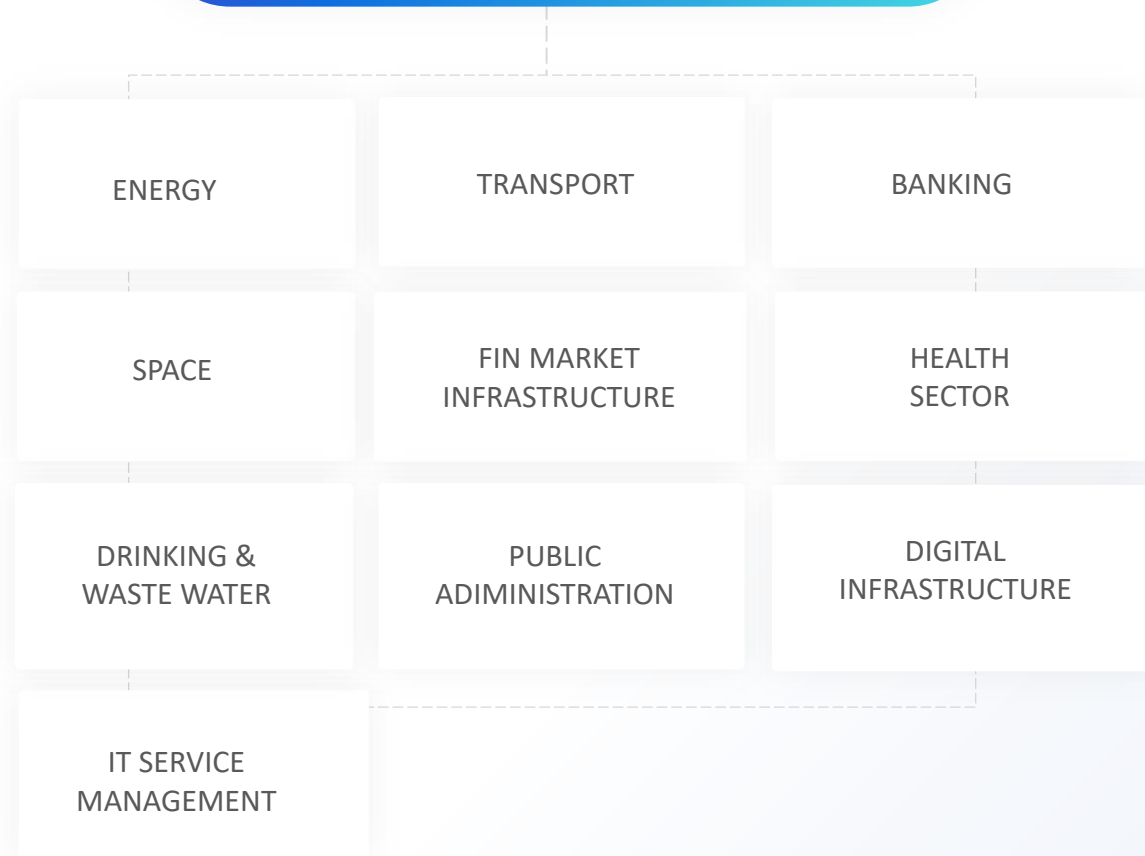

More serious legal repercussions for ramification

Universally enforced in all European Union states

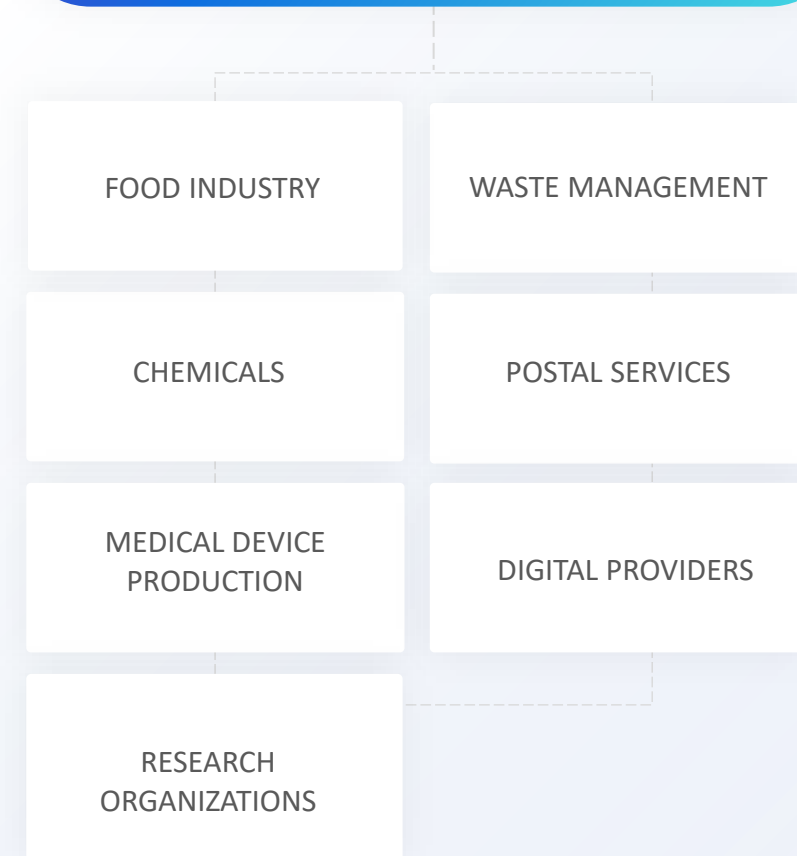

# Industries addressed by NIS 2

## HIGHLY CRITICAL SECTORS

## CRITICAL SECTORS

# Cybersecurity

Our key strengths

## 160+ security specialists

including experienced architects

## Certified specialists

OSCP, CEH, CISSP, GIAC GCIH, GIAC GCFE, CompTIA Security+

## End-to-end support

from security assessment, solution design and implementation to verification, monitoring and incident response

## 150+ projects

in the IT security area

## Secure project rooms

access control, 24/7 monitoring, security mantraps, and more

## Dedicated SOC team

working exclusively on your project

### Partnerships
