

Application Inventory & Real-Time Monitoring Platform

One platform. Full visibility. Zero unnecessary complexity.

Gain real-time clarity across your entire application landscape — without implementing another oversized enterprise tool.

The challenge

Application environments today are:

- > Fragmented and poorly documented
- > Lacking real-time health visibility
- > Difficult to cost-manage
- > Governed by outdated data

Traditional tools only add complexity — expensive, overloaded, and hard to adapt.

You need a simple,
intelligent source of truth.

The solution

A lightweight, fully customizable Application Portfolio Inventory & Real-Time Monitoring Platform delivering:

Unified application
visibility

Live API-based
monitoring

Customizable data model
and dashboards

Expand based on your priorities

Capabilities can be extended based on your roadmap and business needs, including:

- ✓ License and cost transparency
- ✓ Additional integrations and automation workflows
- ✓ AI-powered predictive insights
- ✓ Advanced lifecycle and risk analytics

No unnecessary modules. No vendor lock-in. Just clarity, control, and Flexibility — built around you.

The impact

- ✓ Detect issues early and reduce downtime
- ✓ Eliminate license overspend
- ✓ Improve governance and decision-making
- ✓ Plan proactively instead of reacting

Fast to implement. Built to evolve

- ✓ Quick setup — no large transformation project
- ✓ Easy integrations
- ✓ Dedicated support and continuous updates

Take control of your APPLICATION ECOSYSTEM

See how you can gain visibility, reduce costs, and simplify governance — in weeks, not months.
