Business Case #1

# Document & Contract Management – Sii Results

92%

**Accuracy**

in contract risk identification

93%

**Success**

in extracting critical obligations

89%

**Precision**

in cross-referencing

Recommendation: **DEPLOY**

Business Case #2

# Legal Research & Analysis

## AI that understands the law

Advanced research tools go beyond keywords.

Analyze success rates of legal arguments using precedent

Suggest alternative legal strategies with probability insights

Suggest alternative legal strategies with probability insights

Visualize results through intelligent, context-aware dashboards

Business Case #2

# Legal Research & Analysis – Sii Results

AI-powered research at speed

Our Judicial Reasoning Search Tool  
reduced research time by **50%**

Attorneys gain access to relevant  
precedents with unprecedented accuracy

Recommendation: **DEPLOY**

Business Case #3

# Compliance & Regulatory Monitoring

## Staying ahead of regulation

AI ensures legal teams are proactive, not reactive.

Business Case #3

# Compliance & Regulatory Monitoring – Sii Results

Validated at enterprise scale

AI system deployed  
for a global life sciences client

Automated classification and  
alert routing of legal changes

Recommendation: **DEPLOY**

Future Directions

# Agentic AI – Legal Assistants

## The next phase of AI in law

Agentic AI handles complete legal workflows autonomously.

01

Perform targeted legal research

02

Manage client communications

03

Retrieve and organize legal documents

04

Coordinate internal team tasks

# Agentic AI – Legal Assistants – Sii Results

**Powerful when implemented with purpose and precision**

- Successfully enhanced legal AI assistant functionality
- Effective in conversations; precision use cases require clear objectives and rigorous design to ensure accuracy and trust

Recommendation: **CONSIDER**

# Regulatory Landscape

## – EU AI Act

### The next phase of AI in law

The EU AI Act (Effective August 1, 2024) is the world's first comprehensive AI law.

#### PROHIBITED PRACTICES

Exploiting user vulnerabilities

Social scoring systems

Criminal behavior prediction

Emotion inference systems

# Impact of the EU AI Act on Legal AI

## New boundaries for innovation

Legal AI applications like risk scoring and background checks are affected

Violations may result in penalties up to €35M or 7% of global turnover

SII PERSPECTIVE

The EU AI Act provides a necessary framework for building ethical and trustworthy AI systems in the legal space, balancing progress with accountability.

Recommendation: **COMPLY NOW**

# AI in Legal. From Disruption to Differentiation

- Legal AI is no longer a future vision—it's today's reality
- Success lies in intentional deployment, measurable impact, and regulatory compliance
- Organizations that lead with AI will define the next era of legal services
