SII OFFERING FOR

Data Center Infrastructure Delivery Services

Single partner for electrical, IT installation and commissioning
– reducing risk and accelerating go-live.

One Delivery Model for Data Center Infrastructure

1 Build the Infrastructure

- Electrical installations
- Low-voltage systems
- Structured cabling & fiber deployment
- Rack and cabinet installation
- Power distribution
- Grounding & bonding

2 Make it Ready

- Installation quality verification
- Testing & commissioning support
- Punch-list management
- Integrated Systems Testing (IST) support
- Go-live readiness

3 Connect & Operate

- Network deployment
- Server and storage infrastructure
- Cybersecurity & infrastructure hardening
- Monitoring & maintenance support

One contract. One responsibility.
One delivery governance model.

Offering

Design & Engineering

- Design support
- Capacity planning
- BIM/BMS coordination
- Technical documentation support

Testing & Commissioning Support

- Installation verification
- Electrical testing
- Punch-list management
- IST support
- Operational readiness

IT Infrastructure Services

- Network deployment
- Server deployment
- Storage deployment
- Cybersecurity
- Infrastructure support

Build & Installation

- Electrical installations
- Low-voltage systems
- Structured cabling
- Fiber deployment
- White space deployment
- Grounding & bonding
- Site coordination

Additional Engineering Capabilities

- Electrical Engineering
- Mechanical Engineering
- HVAC
- Cooling Systems
- BMS & Controls
- Industrial Automation
- Commissioning Engineers
- Site Managers
- Project Managers
- Design Engineers

Germany

FRA44

Scope:

- Electrical testing and measurement activities
- Early-phase infrastructure support
- Cable routing preparation
- Large-scale hyperscale facility (~40 MW, multi data hall environment)

Germany

FRA16, Digital Realty campus

Scope:

- Full LV installation package delivery
- Mission-critical facility with approximately 9 MW IT load
- ~4,700 m² IT space
- Team size: 36 personnel including 6 testers, 2 APs, and 2 site/project managers

Netherlands

Global Switch Amsterdam

Scope:

- Electrical and infrastructure testing
- Measurements and preparation of test evidence

Austria

Vienna, Digital Realty campus

Scope:

- Data center project within a major Central Europe connectivity hub
- Electrical measurements and commissioning support

Why Sii?

1.

Relevant Delivery Experience

Experience across Data Center, critical infrastructure, electrical installations and structured cabling projects..

2.

Integrated Delivery Capability

Electrical, low-voltage, commissioning and IT infrastructure services coordinated within one delivery model.

3.

Governance & Quality Control

Transparent reporting, defined quality gates, punch-list management and site coordination.

4.

Financial & Organizational Stability

Stable delivery partner capable of supporting long-term infrastructure programs.to operations

5.

Flexible Engagement Models

Dedicated specialists, Engineering as a Service (EaaS) and managed project scopes.

6.

Faster Time-to-Operation

Reducing the gap between installation completion and operational readiness.

Let's work together

Reach out today to explore how we can support your goals.
